About us

Form & Refine is a Danish design brand that celebrates materials, form and sustainability equally. Our pure materials are carefully selected from around the world and skillfully crafted locally using time-honored traditions. We celebrate the natural form of our materials and create collections of refined Nordic design.

Form & Refine was founded in 2018 by Helle Herman Mortensen, Jonas Herman Pedersen and Lasse Lund Lauridsen – based on the common vision of creating a value-driven design brand that explores materials and preserves our earth and craft cultures through an exceptional design philosophy.

We believe in sustainability by choosing local materials neighbouring local workshops and thereby reducing our CO² footprint. We also believe in making a positive social impact and preserving crafts by working with cooperatives and smaller workshops to create fair and respectful partnerships.

We are proud to build upon the Nordic design tradition. We therefore strive to honor and acknowledge those who came before us whilst breaking new ground. Every Form & Refine item tells a story about its material. The design is clear, modest and elegant, allowing the quality of the materials to shine through.

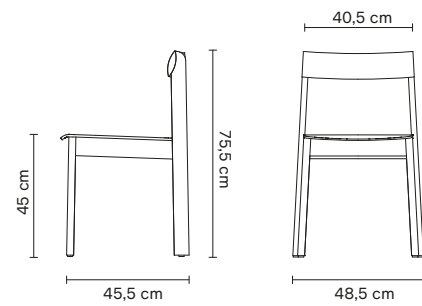

In Praise of Wood

Our furniture designs come from a deep love of wood – our most favorite material. It is organic; it simply sprouts from the soil and supplies us with clean air during its growth. When harvested and manufactured responsibly, wooden furniture is low in CO² emission. It is a material that takes skill to master and is ever-changing. It is warm to the touch and has life and temperament. It expands or shrinks depending on its surroundings. And it only grows more beautiful as time passes.

Form & Refine greatly appreciate the materials we work with. That means we accept and applaud the natural and varied expressions of wood. Therefore, each piece of furniture will always have its very own distinctive traits depending on the grains, knots and colorations of the wood. Not only does this frame of mind support our vision of sustainability, it also honors the idiosyncrasies of natural materials.

These items are inspired by Nordic design traditions. Our carefully selected European collaborators use solid wood from their respective countries. One of our main motivations is to produce our Form & Refine items in close proximity to the source of origin, thereby prioritising sustainability.

In Praise of Ceramic

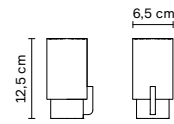

The Alcoa ceramics line is inspired by Nordic design traditions, and made of the finest white clay from Portugal and produced by highly skilled craftsmen there. This combination of local and Nordic traditions results in a beautifully simple and durable ceramic product.

Portugal has a long, cultural tradition of ceramic pottery due to their natural access to clay. Today, the traditions are still important to the culture. Ceramic tiles are omnipresent in the streetscapes of Portugal. Our local partner is a small pottery situated in the region of Alcobaça, whose skills and knowledge of the material and craftsmanship have been passed down to them through the centuries. Every piece is thoroughly inspected and finished by hand.

The aim of the Alcoa line has been juxtapose and contrast. The taut, geometrical design challenges the rugged nature of the clay. The unembellished exterior reminds us of the tactility of nature in opposition to the sleekness of that which is man-made.

In Praise of Alpaca Fibre

Our Aymara textile line is designed in line with the principles of Nordic design tradition and made from 100% of the finest and purest alpaca wool produced by highly skilled craftsmen in Bolivia. This combination results in a simple product of eminent quality.

In our travels around the world, the alpaca from the Bolivian Highlands caught our immediate attention due to the supreme quality of the alpaca fibres. Bolivia is known for its proficiency with natural fibres and expertise with alpaca wool that dates back thousands of years.

Our local partner in Bolivia is a cooperative owned by 400 alpaca farmers and knitters. Their skills and knowledge of the material have been passed on from generation to generation since the ancient civilizations of the Andes.
